

HVVA's Mapping History feature...

Note: Since this project was started in 2008, over 860 historic structures have been plotted within the counties that make up the Hudson Valley Region with the use of Google Maps. Unfortunately Google Maps has been revamped recently causing many previous features and formats to cease working properly, including the link that allowed you to access the maps through our website; hence the need to create this page. Also lost were the hundreds of hours of linking larger images of photos with captions, formatted links and text to provide a more visually appealing means of providing the information on the maps.

In order to view the larger images of the sites, you will now need to access them by manually searching

Maps' Photo Images Albums

<https://picasaweb.google.com/113356789092612867457>

In time, we hope to recreate the functionality to our maps we previously had, but may take hundreds of more hours to do and we still want to continue to add more historic sites to our collection. Please be patient as we attempt to accomplish this in the shortest amount of time. In the meantime, please feel free to continue previewing the maps as they are...

Early NY - Albany Co.
